Income Shares - ISIN GB0005947741 (also representative of Accumulation Shares ISIN GB0005947857)

Objectives and investment policy

Objective

- The Fund aims to produce monthly income. Opportunities for capital growth are also sought, subject to prevailing market conditions.

Policy

- The Fund will invest at least 80% in a diversified portfolio of (1) investment grade and (2) sub-investment grade bonds, issued by corporate issuers, public bodies and supranationals, and (3) developed market government bonds.
- The fund may also invest in other bonds.
- The bonds in which the Fund invests will be denominated in sterling or denominated in other currencies and hedged back to sterling.
- Currency forwards and derivatives, which are types of financial contracts, are used for both investment purposes and in the management of risk.
- The Fund will be actively managed through bond selection and strategic asset allocation.

Other Information

- Bonds are a type of investment which can be issued by governments, companies and other organisations when they want to borrow money. The issuer of the bond owes the holder a debt. The issuer is obliged to pay interest and/or repay the debt at a later date.
- Sub-investment grade bonds typically mean the risk of non-payment is high.
- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus.
- For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within three years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- Market conditions can change rapidly and a fund in any rank can lose you your investment. The Fund is classified as above as it invests in corporate bonds.
- The indicator does not take into account the following relevant material risks.
- Bonds are affected by interest rates and inflation trends which may affect the value of the Fund. They could lose value if the issuer's financial health deteriorates.
- Derivatives can magnify losses if returns go down.
- In adverse market conditions it may be difficult to sell investments held by the fund in a timely manner and their value may fall significantly. This could affect how much money you receive and even delay the selling of your shares if dealing in the Fund is suspended.
- Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.
- You could lose your investment due to global factors like natural disasters, pandemics, or through developments such as military conflict, or changes in government policies.
- The manager can charge some, or all, expenses to the Fund's capital, reducing its value. This amount can vary from year to year.
- For a more detailed explanation of the risks, please see the "Risk Warnings" section of the prospectus.
